NATURAL INDOCOCONUT ORGANIK

## About **NICO**

---

Established in 2019, PT. Natural Indococonut Organik (**NICO**) strongly believes that coconut is one of nature's unique and versatile products.

Our products are made from natural ingredients, and our raw materials are sourced in environmentally-sustainable ways. Our company makes the most of every part of the coconut fruit by developing valuable products for our consumers. There is less waste and environmental impact from our processes to deliver these products to our customers.

# Your Partner to **GROW**

---

The tagline “Your Partner to Grow” represents our mission to grow together with our partners, including farmers, employees, business partners and customers.

**NICO** is a world-class producer of coconut-based products. We listen to our partners/customers in order to present the best products that meet our customers’ needs.

Our company believes in environmentally-sustainable practices to help build thriving communities and secure future growth potential.

# Product **Category**

## **Coconut Cream**

Coconut cream is the milky white liquid extracted from grated coconuts. Dubbed as white gold, this creamy and savory liquid serves as a dairy alternative that is completely plant-based. Our coconut milk is free from MSG, bleach, and preservatives, making it the healthy choice that is both delicious and convenient at the same time.

## **Coconut Water**

The clear juice from freshly opened coconuts is the perfect thirst quencher on a hot summer day. Since coconut water is naturally rich in minerals and electrolytes, it is a natural isotonic drink, suitable for rehydrating after your energetic day. Nico takes the fresh coconut water and preserves the electrolytes and low calorie-deliciousness in a convenient ready-to-drink packaging you can grab in the middle of your activities.

## **Coconut Milk Beverage**

The perfect blend of smooth, creamy coconut milk and refreshing coconut water, our coconut milk beverage is the dairy-free, lactose-free choice for your coffee, smoothies, cereals or desserts. Though it is suitable for vegans and people interested in plant-based diets, we are confident this incredible sweet and savory beverage will turn even the most discerning milk-lover into making the switch. Without additional sugar, coloring or preservatives, this coconut milk beverage lures you with its savoury taste and sweet milk aroma.

## **Virgin Coconut Oil (VCO)**

Virgin coconut oil made from grated dried coconut meat has become one of our most popular products. People praise it for its health benefits, including antimicrobial and antioxidant properties. Coconut oil is a rich source of medium-chain triglycerides (MCTs), a type of saturated fat that is rapidly absorbed and converted into energy by your body. Our coconut oil is not refined, sun-dried, nor deodorized, thus the resulting product is non-hydrogenated and free of trans fats.

## Desiccated Coconut

We produce 2 types of desiccated coconut: low-fat and high-fat desiccated coconut. High-fat desiccated coconut is made from drying the freshly grated coconut meat, which preserves the original fat content and rich coconutty flavor. The low-fat version is made from drying grated coconut meat after coconut milk has been extracted. Subsequently it contains 35-48 percent less fat than its high-fat counterpart. Both products are of the highest quality and free from chemicals, dyes, and artificial flavors.

## Coconut Flour

Coconut flour is a natural byproduct of coconut milk production. Coconut flour can be used as a substitute for wheat flour in gluten-free diets. Compared to wheat flour, coconut flour has more fat, iron, protein, and fiber, and it has a lower glycemic index rating than wheat flour, meaning it takes longer to digest and absorb the carbohydrates in it.

## Coconut Chips

Coconut chips are a new non-fried snack made from fresh coconut meat. Our coconut chips are available in 2 variants, original and baked. Each retains the sweet nutty flavor of coconut meat, perfect as your healthy go-to snack.

**Semurni Kasih Mama!**

MamaKoko literally means “mother of coconut”, symbolizing the character of a loving mother figure who wants only the best and healthiest options for her family.

We recognize mothers play an important role in the family. Mothers are often the manager in the household, in charge of the daily menu, the household budget, and caring for the health of her family. Which is why we are proud to name our product with an homage to all the mother figures who express their love by providing the best for their family.

MamaKoko is a practical packaged coconut milk made from selected coconuts. Our coconut milk goes through sterilization, without added bleach, MSG, and preservatives to produce high quality coconut milk that is naturally white and tasty. MamaKoko's coconut milk has been registered with BPOM and halal-certified from MUI. MamaKoko can be consumed directly or used as an ingredient in food and beverage mixtures such as soto betawi, chicken curry, vegetable lodeh, kolak pisang, cendol and so on.
