

Adore Rempah Indonesia

Adore Rempah Indonesia is a vanilla producer located in the heart of the vanilla farms on Sulawesi Island. Committed to sustainability and inclusivity, Adore has direct access to impose high-quality raw material selections, while its farmers benefit from improved welfare.

Complemented by standardized curing methods, Adore ensures consistent production of remarkable vanillin-rich vanilla, achieving up to 3.8% vanillin content (for our crystallized/frosted vanilla beans) with an average of 2%. Adore solves the low-quality vanilla problem in the market (where most vanilla barely reaches 1.3%), providing its customers with peace of mind through a vanillin content guarantee.

Adore vanilla has been distributed to some world's famous pastry chefs, stores, and extraction companies, reflecting exceptional quality.

PRODUCTS & QUANTITIES PER YEAR

- + Vanilla beans gourmet grade / 10 t
