# COCONUT PRODUCT CATALOGUE

Your reliable source for bulk, retail,  
 private label or one of our own brands:

## WHY US?

Natural Indococonut Organic, PT (“Nico”) is the leading organic coconut product supplier in Indonesia. Two “state of the art” factories located in strategic areas in Indonesia (Riau Islands and North Maluku) can process more than 600.000 coconuts daily. With these large production volumes we are able to serve any needs of the most discerning customers in bulk and retail.

We do not only provide the coconut lover with fresh and savory coconut products but focus in serving an ever increasing health conscious society as well as people that want to contribute to a meat - and animal product free life style.

# LOW FAT DESICCATED COCONUT

Our organic low fat shredded coconut (3% moisture content max) derives from the dried coconut milk press cake (shredded fresh coconut meat after coconut milk has been retrieved) and therefore contains less fat (35-50%) than ordinary desiccated coconut “HFDC” that is gained by grating and drying mature coconut kernel. Low Fat Desiccated Coconut is available in medium grade particle size. Exact grate measurements are available upon request.

ALL OUR PRODUCTS ARE

*Vegan*  
BY NATURE

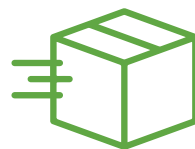

## Product Specification

# HIGH FAT DESICCATED COCONUT

Fresh coconut meat from the Eastern coasts of Sumatra is used daily to produce one of the best High Fat Desiccated Coconut in the market. Also called shredded coconut or coconut flakes, low temperature soft drying guarantees full preservation of all its vitamins, minerals and heavenly tropical coconut taste. We do not use or add any sulfurs, preservatives or flavours, our High Fat Desiccated Coconut is 100% natural. It is available in medium and fine particle size. High Fat Desiccated Coconut has gained much in popularity worldwide as ingredient in many recipes such as fillings and toppings in confectionary, cakes, cookies, snack- and chocolate bars ice-cream and other desserts with a tropical “note”.

ALL OUR PRODUCTS

# COCONUT WATER

Among people in tropical countries with ready access to coconut palms, Coconut Water is renowned as a refreshing, highly nourishing drink with a delicious aroma and flavour. But, despite Coconut Waters potential as a competitor in the bottled beverage market, attempts to capture those qualities in a commercial product have been often unsuccessful. Once exposed to air, Coconut Water begins to ferment and rapidly loses most of its flavour and nutritional characteristics. Our Coconut Water is carefully extracted from fresh coconuts and heat treated only for a couple of seconds in order to retain all the inherent properties of the natural Coconut Water including vitamins, minerals and taste. Coco Club Coconut Water is ready to carry the best tasting Coconut Water to your doorstep.

# CANNED COCONUT MILK

*We love working  
with coconuts!*

Canned Coconut Milk is having more than a moment. Loved by paleo dieters, vegans and foodies alike, the canned stuff can mimic milk and cream in recipes, from soup and curries to yogurt and ice cream, adding a rich milky texture without added dairy. After the coconut water is retrieved from the nut, it is de-shelled and the brown skin shaved-off. After cleaning the white flesh with hot water steam, it is grinded and freshly pressed with a screw press. The raw Coconut Milk is then homogenized, filled in BPA free cans and sterilized. The whole process does not take more than 2-3 hours which is important to keep the freshness of the milk.

# COCONUT MILK

Coconut Milk is the only cow milk surrogate that carries the same name “milk” even though it is entirely plant based. Indeed it is white, creamy and has a rich taste. We all know that Coconut Milk cannot be “milked”, so how is UHT Coconut Milk done? It is the same process as UHT cow milk but completely vegan. No animal substances involved. Fresh raw Coconut Milk is diluted with filtered water to get the desired fat content (18-24%). Then the creamy white and aromatic fluid passes a flash heat procedure to remove all spoilage micro-organisms. Gentle homogenization provides viscosity and smooth milk fluid filling into aseptic TetraPak containers or in bulk aseptic bags or IBC tanks.

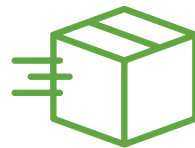

## Product Specification

- **Appearance & Colour :**  
White, no discolorations

# COCONUT MILK DRINK

As the name suggests this Coconut Milk Drink is for drinking and not suitable for cooking, refine sauces or baking. NICO has created a wonderful dairy and lactose free Coconut Milk Drink for the milk lover that does not want to compromise with lactose, milk sugar and animal derived fats. Not from any concentrate, Vegan and GMO free. We have emphasized on taste and creaminess to satisfy the most discerning customer. Coconut Milk Drink 1 liter contains the milk of one whole coconut and the juice of more than 2 coconuts. Enjoy the goodness of two coconuts in one container. Suitable as dairy free alternative for cereal and mueslis, milkshakes, iced coffees, lattes and teas, smoothies or frappuccinos and why not for your own creative drink?

We support more than 600 small scale farmers in Sumatra

# VIRGIN COCONUT OIL

Since its reputation as a high quality oil has been restored, natural coconut oil gained from freshly shredded dried coconut meat, is one of our most sought after products. Our coconut oil is cold pressed and untreated. We do not “RBD” refine, bleach nor deodorize it and we guarantee that our Virgin Coconut Oil is not hydrogenized and 100% transfat free. Our Virgin Coconut Oil is as smooth as velvet and as clear as spring water. Available in 950ml, 620ml, and 220ml high quality glass jars with PVC free inliner lug caps.

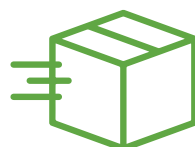

*Coconuts are not  
just plants - They are  
our partners*

and 950ml

**Bulk :**  
10 liter pale, 200 liter drum,  
920kg IBC tout

# COCONUT FLOUR

Used in the bakery industry or as nutrition packed topping for mueslis or cereals, Coconut Flour is considered a top coconut derived product. Coconut Flour is gained by graining the remaining “coconut cake” after the oil has been retrieved. Coconut Flour has a sweet, nutty aroma and is ivory or light cream in color. Since it doesn’t contain gluten, people on gluten-free diets can substitute Coconut Flour in their recipe for baked goods. Coconut Flour contains an astonishing 17-20% plant protein as the retrieved Virgin Coconut Oil does not absorb any protein and is high in fiber but low in calories.

All our  
*Coconut*  
delicacies are  
non-GMO

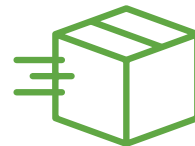

## Product Specification

# COCONUT CHIPS

**Organic natural  
coconut chips**

**Organic roasted  
coconut chips**

Coconut Chips are a trendy oil free snack that are made from fresh creamy coconut flesh. Our Coconut Chips are available just dried as “natural chips” or oven baked as “toasted or roasted chips”. Try our natural chips as a “salad sprinkler” or enrich your cereals and mueslis with some extra tropical tasty fiber. As creative topping to stir fry home made dishes you can be sure to get extra attention from your guests. Add our oven baked Coconut Chips to your own trail mix with almonds, hazelnuts, goji-berriew, raisins ... and create your super food accompanying your online work, long haul travel or as afternoon booster.

## Product Specification

# COCONUT WHIPPING CREAM

Coconut Whipping Cream is our masterpiece in dairy imitating products. Not only does it taste delicious as topping for desserts, fresh fruit or fruit salads, cakes, ice cream, soups, shakes and ice-coffees, it is also Keto - and Whole30 friendly. Organic Virgin Coconut Oil is the magic ingredient that enhances creaminess and stability of the whipping cream. Coconut Whipping Cream has 10% less fat than its dairy counterpart and significantly less cholesterol. Our whipping cream creates a glossy, voluptuous mass and holds its shape beautifully. Coconut Whipping Cream is ready to replace heavy cream and will find enthusiastic followers in the vegan and non-vegan society alike.

## Product Specification

# COCONUT MILK POWDER

Coconut Milk Powder is nothing else than dried coconut milk and serves as a perfect option to replace cow milk, no matter if you want to prepare an Asian dish or a creamy mashed potato, soup or smoothie. No need to open a can or a TetraPak if you want to have coconut milk always within reach. For its convenience and light weight, many kitchens use Coconut Milk Powder instead of liquid milk.

Fancy coconut cream? Just add less water. Want a thin milk to make a refreshing smoothie? Just add more.

When you've used what you need, simply pop the packet closed, making it air tight, and then put it back into the cupboard for the next use, either tomorrow or next month. While opened, Coconut Milk Powder can last for 6 to 12 months if stored properly.

## Product Specification

- **Appearance & Colour :**  
White, no discolorations
- **Flavour & Taste :**  
Exotic flavour and Aroma of fresh coconuts
- **Texture :** Fine Powder
- **Total Fat :** 65.0% min

# BARISTA COCONUT CREAMER

In Indonesia we are in love with our heavenly smooth coffee (we call it “Kopi”), prospering on the volcanic slopes and – soil, creating that specific rich and aromatic taste, paired with sweet chocolaty notes. But did you know that Indonesia is also the largest producer of a totally plant based non-dairy cow milk alternative, similar in color (white), creaminess, natural sweetness and texture?

## **Coconut Cream**

It is evident that we felt obliged to create this perfect match of creamy, frothable and coconutty sweet to your coffee. Use our lactose-, gluten-, and animal fat free coconut milk creamer for any type of coffee drinks or tea, hot, iced or cold.

*Coffee with a friend is like capturing happiness in a cup.*

# COCONUT FIBER PRODUCTS

PLANTS  
LOVE  
COCO PEAT

Perhaps the most versatile of all the organic mediums available originates from the coconut. Coconut Fiber and Coconut Coir (Coconut Peat) are gained from the outer husk of the coconut and are highly sought after products for home use and industry that are looking for sustainable and environment friendly solutions.

Coconut Fiber has a high lignin content and thus a low cellulose content, as a result of which it is resilient, strong and highly durable. The list of products that are made of coco fiber today is striking: ropes, mattresses, door mats, brushes, landscaping, soil erosion control, vehicle seats, dashboards and many more.

Plants love Coco Peat ....

Coconut Peat is an excellent affordable alternative for peat moss with natural resistance for disease, it also provides perfect water retention and aeration. It is ideal for use in greenhouses, potted plants and outdoors. There is indeed no waste with coconut.

## COCO PEAT BAIL

**Dimension (cm):** 30 x 30 ± 3

**Weight:** 5.0 ± 0.1

**Fiber/Impurities (w/w):** 2.0% max
